MARITIME SITUATION REPORT (SITREP)

JMOC BALTIC THEATRE

DTG: 291350Z OCT 26
PRECEDENCE: FLASH / IMMEDIATE

DATE-TIME GROUP	AREA OF OPERATIONS	OBSERVATIONS	PRIMARY HOTSPOT
291350Z OCT 26	**BALTIC SEA (GER)**	**30 TRACKS ANALYZED**	**ROSTOCK HARBOUR**

SECTION 1: HIGH-PRIORITY THREAT EVALUATION (CRITICAL)

CRITICAL CONTACT DETECTED — ROSTOCK APPROACHES
Buoy MAD-456 registered a **-1.4 magnetic anomaly** at **1.68 km** from Rostock harbor approaches. Classified as **POSSIBLE_SUBMARINE**. This represents the single highest priority underwater threat. Immediate ASW vectoring and platform verification required.

SECTION 2: GEOGRAPHIC HOTSPOTS & ANOMALY MATRIX

Sector / Port	Data Source	Threat Level	Tactical Assessment
Rostock	Buoy MAD-456 / OSINT	**CRITICAL**	Mag anomaly (-1.4) @ 1.68 km. Subsurface threat contact.
Kiel	Sensors / OSINT	**MEDIUM**	Anomalies logged (203.6). Social media refs to 'uboot'.
Greifswald	OSINT / AIS	**MEDIUM**	Increased OSINT chatter ('uboot', 'sanctioned'). AIS clean.
Stralsund / Travemünde	AIS / OSINT	**LOW**	Routine baseline traffic. No critical anomalies flagged.

SECTION 3: CONCLUSIONS & DIRECTIVES

DIRECTIVE 01: ASW ASSET VECTORING
Focus Anti-Submarine Warfare resources immediately on the 1.68 km proximity zone off Rostock Harbour entrance.

DIRECTIVE 02: RECONNAISSANCE & VERIFICATION
Assign Maritime Patrol Aircraft (MPA) or Unmanned Surface Vessels (USVs) to conduct MAD and dipping sonar sweeps over Rostock and Kiel anomaly locations.
